

# UNIVERSAL PRINTER 1.1

Universal Printer extends Windows Terminal Services providing a fast, secure, reliable and efficient print solution. The easy-to-use software works with Windows® and Linux®/Unix® clients enhancing Remote Desktop printing with driver-free technology that eliminates the need for printer drivers administration in terminal services environments.

## FEATURES:

### Administration-free

Easy and fast to install, Elusiva Universal Printer requires no administration whatsoever.

### No need to install printer drivers

Eliminates a need for tedious validation and administration of printer drivers on the terminal servers.

### USB, parallel & network printers compatible

Perfect for integration of thin clients and PCs, with local or network printers – with support of all interfaces

### Multifunction devices compatible

Works with traditional printers and as well multifunction devices exposing a printer interface.

### Up to 128-bit encryption for communication security

Communications are encrypted by default using secure WTS virtual channels, assuring secure transfer of information.

### Works with Windows® Remote Desktop Connection Client

Uses documented API to extend existing RDP-enabled clients for Windows and other operating systems.

### Virtual Machine compatible

Can be used to enhance virtualization solutions from VMware, Microsoft and other vendors

## REQUIREMENTS:

### Hardware

Networked computer with 1-Gigahertz (GHz) or faster x86 compatible CPU.

### Operating System

Windows® 2000 Server, Microsoft Windows® XP, Windows® Server 2003, Microsoft Windows® Vista and Microsoft Windows® Server 2008 with Terminal Services enabled, Microsoft Windows® 7 and Microsoft Windows® Server 2008 R2.
